**COMBI
ASPHALT
MACHINE**

Combi Asphalt Machine is combination of asphalt distributor, hydrostatic road sweeper and water sprayer. It is easy to use with a single control panel from driver cabin. The integration of different applications into one machine enables you to save considerable amount of initial investment and operation costs.

MAIN FEATURES

- ◆ **Distributor spraying capacity**, vehicle speed, pump flow rate, sweeping speed, water pump capacity and other variables can be traced and regulated from the control panel in the driver cabin.
- ◆ **Emulsion and water tank capacity** vary according to vehicle dimensions.
- ◆ **Optimized design** for daily emulsion consumption of hot mix asphalt applications.
- ◆ **All options** for the asphalt distributor are also available.

COMBI ASPHALT MACHINE

MAIN FEATURES

- ◆ **Front and rear water sprayer.**
- ◆ **Integrated pump** and hose for daily water needs of cylinders, wobble wheel roller and mills used in hot mix asphalt applications.

GENERAL SPECIFICATIONS

- ◆ **Vehicle & sweeping speed**, water pump capacity and other variables can be monitorized on remote controlled PLC unit.
- ◆ **4.000 – 8.000 It** emulsion tank capacity. Optimized design for daily emulsion consumption for asphalt applications.
- ◆ **Front & rear water sprayer** with 4.000 – 8.000 It tank capacity. External hose to fill up asphalt rollers and milling machines' water tanks. Optimized design for daily water consumptions for road construction machines.
